Glückauf

TRADE MAGAZINE FOR
MINING // RAW MATERIALS
ENERGY // POST-MINING

Media
Information

2026

Short description

Mining Report Glückauf is the leading technical-scientific trade magazine for mining, raw materials, energy and post-mining. It is primarily aimed at decision-makers in the mining and mining machinery industry and mining administrations. The magazine is additionally circulated amongst the authorities, councils and research and testing institutions, as well as universities.

Mining Report Glückauf offers companies participating on the market an excellent editorial environment in which to present their current projects, product news and services.

The main topics dealt with in Mining Report Glückauf are:

- // Mining: Planning, development, operation and decommissioning of mines below and above ground
- // Post-mining: Land recycling, land reclamation, water retention, reuse
- // Raw materials: Exploitation of raw materials (coal, ore, salts, rare earth, natural stone, gravel and sand)
- // Energy: Energy policies, energy sector, energy feedstocks, energy supply
- // Work safety, occupational health and safety, environmental protection in the mining industry

Other topics include basic and advanced training, as well as political aspects and legal issues. The latest industry news, technological innovations, introduction of new products, job adverts and event information complete the spectrum of content.

Mining Report Glückauf is the successor to the former German trade magazine Glückauf and has been tracking the technical developments in the field of raw materials and energy in the mining industry for over 160 years.

Mining Report Glückauf is published as an online journal every other month in English and partially in German. Special issues are distributed as printed magazines at the relevant national and international trade fairs and events.

All Mining Report Glückauf articles can be found online at www.mining-report.com

Does your vision go beyond the standard grid?

Sometimes a special message requires more than a standard format. We provide the flexibility for custom placements and creative integrations directly within our editorial environment. Whether in technical papers or industry news: we ensure your advertising appears exactly where it has the greatest impact.

Your idea, our implementation.

We would be happy to work with you to develop individual special formats that are perfectly tailored to your communication goals.
